### **Spring is Coming...**

Okay, not as dramatic as "winter is coming" but a lot more hopeful! It's hard to think about Spring when it's -15 C outside and snow on the ground but we know from years past that spring ALWAYS arrives. Sometimes it's late but it always comes. So why is spring so important to us? Why do we depend on the certainty that spring won't fail us?

I could get into all kinds of intellectual theories on the symbolism of spring but none of us want that right now. Simply, it is the same reason we count on the fact that the day always follows the night—no matter how dark things are, the light always returns. Many things in our lives are unpredictable, but we know that night always turns to day and winter always turns to spring. Now, when you live in the north, the timing can vary but even that can be somewhat predictable based on past patterns.

1

Most people like fun surprises but they also take comfort in familiar things. For instance, we know that officially spring begins on March 21st in the northern hemisphere. We also know that the experience of spring starts at different times depending on where you live and what the weather has been doing that year. So we get the comfort of knowing that spring is officially here on a specific date but the joy of surprise when the crocuses finally poke through the last of the snow.

What has all this to do with the library? Well, if you want to know more about the changing seasons, weather patterns, or just start planning your garden—we're happy to help.

—Your Friendly Neighbourhood Library Tech
